ROME AGE

AUDIO VIDEO PERFORMANCE

THE AUDIO VIDEO PERFORMANCE

ROMEAGE INVESTIGATES THE
RELATIONSHIP BETWEEN ART AND
TECHNOLOGY.

A relationship between ancient and
modern is interpreted through new
expressive forms; technology is used
in the service of creativity and art, in
a marriage of image and sound rich
in emotions.

Giulio Maresca generates the audio in real time with synthesizers, sequences and electronic drums, outlining a dilated and changeable sound setting. Arpeggios, ambient sounds and modern rhythms project the listener in an abstract imagery.

LiZ transforms and shapes the high definition images by creating parallel worlds in which shapes, colors and geometries expand the natural beauty of the city, symbol of ancient splendor.
